

what is elemental music and movement?

As a child uses all the senses to discover the world, an *elemental music* approach uses speech, movement and music to explore, learn and create. Inspired by natural speech patterns and basic rhythmic impulses, children can easily replicate simple musical ideas using the voice, body percussion, movement and instruments, gradually expanding to larger patterns, forms and improvisation. This appealing and accessible approach naturally leads to the acquisition of skills and concepts while providing the groundwork for creativity in both music and movement.

Childs-play becomes artistic and fulfilling, providing the essential elements for a high standard of individual and ensemble achievement.

our mission

The mission of the American Center for Elemental Music and Movement is to promote the artistic and pedagogical possibilities of elemental music and movement. In the belief that all human beings have the need and capability to express themselves artistically, the Center will offer educational and performance opportunities for children and adults. This will be accomplished through the creation of programs for educators that identify, explore and develop the skills and appreciation of elemental artistic styles. The focus of the Center's work will be to bring the humanizing touch of elemental music and movement to all who experience it.
